SPECIALTIES

Physical Therapy

Physical Therapists work to restore mobility and promote independence. The goal is to move the patient toward greater independence and mobility, either unassisted or with assist devices. The licensed physical therapist focuses on improvement, coordination, balance, strength and endurance.

Occupational Therapy

Occupational Therapist use goal directed activity to help restore, maintain and improve daily living skills. The goal is to assess personal self-care and daily living skills and to provide modified techniques and/or adaptive devices, as necessary, to assist patients achieve the skills needed in activities of daily living.

Speech Therapy

Speech-language Pathologists focus on improvements in swallowing, hearing, speech, and language proficiency. The goal is to assess and provide treatment for individuals with disorders of speech, language, swallowing, communications and/or feeding programs to help the patient recover lost skills or develop new ones.
